For the first time since the outbreak of the current Ebola crisis, no new cases of the deadly virus have been reported in West Africa. And even as the deadly disease rages on in the DRC, there are signs that the outbreak is slowing. The World Health Organization declared the outbreak over on 11 September 2015. The current outbreak was declared on 8 May 2014. WHO declared it a public health emergency on 8 August 2014. Here's everything you need to know about Ebola and how to protect yourself: What is Ebola? Ebola is one of the world's most virulent viral diseases - it's named after the Ebola River in the Democratic Republic of the Congo. Its most characteristic sign is a
