Подскажите библиотеку или веб страницу с сохранением паролей на карту. А пожалуйста, если есть возможность конечно пользоваться, дело красоту.You want to start a fire, but your matches are gone and your lighter is busted? Try this quick-and-dirty method. Get a bread knife, hold the end over a hot burner, and press it down. The bread will start sizzling, and you'll get a small flame. This trick works for other things you might be carrying in your pocket, too. Try it with your keys, or with an empty soda can. Hold it in one hand and use the other hand to try to start a fire. You can even do this with a paper bag. The final thing you can do is a trick in which you light a match, quickly toss it over your shoulder, and create a small fire. It's a lot like a paper bag fire, but it's smaller and faster. You can do this in a car and start a fire without setting off the car alarm. Q: VBA Put string in specific cell I am writing a sub that will create a string of certain cells that are blank. For example, the user enters A, then B, then B. The input should be copied to row 20, column C. What I have so far is: Sub PutBlanks() Dim i As Integer Dim x As Integer i = 1 x = 20 Do Until IsEmpty(Cells(i, 1)) Cells(x, 3).Value = Cells(i, 1).Value i = i + 1 Loop End Sub I don't know why it won't work. Could anyone help me? Thanks.

This study aims to demonstrate the efficacy of the intervention for improvement of quality of life in nursing care and control of type 2 diabetes mellitus (T2DM) in diabetic patients. We also assessed if the intervention would be effective in terms of effects on glycemic control. This randomized controlled trial recruited 64 diabetic patients from Ewha Womans University Hospital in Seoul, Republic of Korea. The participants were randomly assigned to the intervention group (n = 32) and the control group (n = 32) and were given a standardized intervention for 8 weeks. The intervention group received individualized guidance on T2DM control, while the control group received regular care provided to patients without T2DM. Quality of life was measured using the diabetes-specific quality of life measure (DSQOL) at baseline and at 2 and 8 weeks after the interventions. Data analysis was performed using SPSS 18.0 (SPSS Inc., Chicago, IL, USA) and p values were calculated using the independent samples t-test and paired t-test. At 8 weeks, the control group showed no significant change in DSQOL (p = 0.10). In the intervention group, the mean score on the DSQOL subscale for self-monitoring decreased (p = 0.03), but was not statistically significant. In the control group, the mean scores on the total DSQOL scale and subscales were not changed (p = 0.30-0.67). Our results suggest that the intervention may improve patients' diabetes-specific quality of life and that this is associated with a decrease in HbA1c.President Trump and Chinese President Xi Jinping are due to meet at the Group of 20 summit next week. But they are unlikely to move any closer to agreeing a trade deal. The Washington Post reports that China is demanding concessions in return for making any progress on the trade front, and that the summit next week will be a "show of force." Chinese officials are telling the United States that they would be willing to wait until mid-November to resolve the trade dispute if Trump offered them a big enough trade concession, the Post reports. The trade war is the biggest threat to both countries. The United States is America� 2d92ce491b
