Adjustment If you would like to adjust the font, resize the button on the first line. Many popular browsers have built-in zoom or "font size" options. If not, you may need to install a 3D text-zooming or "text enlarger" program. You can make the text too small by clicking on the "small" button. The program will adjust the font size automatically if you adjust the size of the text field, but you can change it by hand if you want to. Most programs have a 3D text renderer, so they will allow you to change the text color, transparency, and even make it thicker, thinner, etc. Some programs like this have special "styles" that you can apply to the text that will make the text appear in a different style, if you want to make the text thicker or thinner, or in a different color. If you are dealing with older browsers like Internet Explorer 6, 7 or 8, your only option will be to change the font size in the browser. 3D Animation of C# code See Also I used Photoshop and PaintShop Pro to make this video. Although PaintShop Pro is a powerful video editor, Photoshop is a little easier to use and has more tools for me. PaintShop Pro is a big program and I would not have been able to make this video with the tools that it has. I just know how to use it and I use it sometimes to make the thumbnails for my videos but for anything more than that, I am not that savvy with it.
