2010 financial services; [financial instrument] 10.09.2019 Thanks for being a part of the SelftradeZ communities! An estate is the assets of an individual who has died. This would include all the financial accounts and property he or she owned at the time of death. Businesses also have an estate which includes all the financial accounts and property they owned at the time of death. At all times, one should carry a portfolio of enough money to last more than a single month. This requires having an amount of money in the form of a savings account, a money market account, or some other form of interest bearing money which is readily available. A personal finance expert would advise having at least 2 – 3 months of living expenses in the form of liquid money (cash). Another major form of wealth is a home. However, unlike your company's profits or the stock market, home prices are not usually very volatile. In other words, home prices are usually stable. In other words, you will need a portfolio of money that will make you financially independent and able to enjoy life. A financial advisor is a finance professional who provides consulting and advice about an individual's or entity's finances. Financial advisors can help clients develop a personal financial plan. They can also assist clients in making better financial decisions and reducing their risk of financial hardship. The term financial advisor is used in most developed countries. Financial advisors can be located in the financial services industry, at financial institutions, at mutual funds, at insurance companies, or at public companies. Most states in the United States have a licensing agency for financial advisors. The purpose of financial advisors is to help their clients develop and maintain a financial plan for their lives. The U.S. Securities and Exchange Commission (SEC) defines a financial advisor as a person who, for compensation, engages in the business of advising others, as to the acquisition, management, and disposition of money or property, either directly or through the rendition of legal, accounting, or other professional services, or who holds himself or herself out as having such knowledge or training. Personal finance is the study and management of money, assets, and debts of an individual or entity, including paying bills, managing credit, and minimizing taxes. It also includes a framework for evaluating an individual's spending and saving and an understanding of the global economy and the effects it has on people's daily lives. These aspects are sometimes divided into personal finance 2d92ce491b
