I need to sort the values based on the id in table5 but in table 2. select

table5.id, table5.val from table1 inner join table5 on table1.id = table5.id where table1.status = 'on' and table1.del = 'on' group by table5.id; Then in PHP I have the following code: \$sql = "select table5.id, table5.val from table1 inner join table5 on table1.id = table5.id where table1.status = 'on' and table1.del = 'on' group by table5.id"; \$q = \$this->pdo->prepare(\$sql); \$q->execute(); while (\$row = \$q->fetch()) { \$arr[] = array("id" 2d92ce491b
