From dual SIM mobile devices to customizable wallpapers and revamped apps, Android smartphones have become more than a phone — they're a phone-centric lifestyle. Even the simplest smartphone has a substantial amount of software preloaded and functionalities bundled, which makes your time using it much more enjoyable. But all those useful apps and features don't come cheap, and the shelf life of the smartphone's battery is also bound by its operating system. And if you buy a low-cost smartphone, you'll soon see that most of the cheaper mobile phones around don't have much software other than the OS itself. You might be curious whether the phone you have now is worth your time and money. But that's not always the case. You can also browse and compare over 50 models of smartphones — everything from gaming-oriented and budget to feature-rich and mid-range options — to find the perfect device for you. We've assembled some of the latest and best Android smartphones from renowned brands for your consideration. We present them in a way that will help you find the best deal. So, let's dive in and find the best Android smartphones to buy. The first budget Android smartphones saw a massive explosion in 2017, which continues to this day. The OnePlus 5T continues to sell out, and the OnePlus 6 launched at a cost that's a third of what it used to be. The Xiaomi Mi A1 started the trend. Here are some of the best budget Android smartphones you can buy now. The Xiaomi Mi A1 comes with a beautiful 5.15-inch AMOLED display with a 2,220 x 1,080-pixel resolution and a notch. It runs on an Android 8.1 Oreo-based MIUI 10, which looks very similar to the company's MIUI 9 skin. It sports a Qualcomm Snapdragon 625 SoC, paired with 4GB of RAM and 64GB of onboard storage. The smartphone is also well-equipped with a dual-camera setup at the back: a 12-megapixel Sony IMX398 lens with f/2.2 aperture and a 5-megapixel f/2.0 lens. Its selfie snapper is a 16-megapixel Sony IMX298 sensor, with f/2.0 aperture. A front-facing camera is also present on the device. As a variant of the Mi A1, the Mi A1 Lite has the same specifications, only with 4GB of RAM and
