# Start Key Center Xentry Keygen

Hello, I tried using several keygen to insert the keygen, saving is successful, but then it says "startkey center unable to identify profile". What to do? Last edited by mikkell on 3/12/2009 at 5:47 pm. Reason: Added post your turn off the old version of the program and download the new one, or buy a key if you have money, but if you have keys it is better to use the keygen. What is the problem? Maybe you are trying to save the keys with different versions of the program? Try to save the keys in the same folder with the program and after that in the keygen Please tell me how in KeyGen you can tick the option "save as".
