AutoCAD is currently available for Windows and macOS systems. Autodesk's subsequent AutoCAD release, AutoCAD LT, is available for both Windows and macOS. History AutoCAD's history is one of rapid iteration and change. Since the application's early days, the user interface has changed, and the range of features available has increased. The program has been extended and improved by Autodesk over time and to fit the needs of its customers. 2. AutoCAD Architecture and User Interface 2.1. The Architecture Before AutoCAD version 2, the program's architecture was based on the "Mills Model" architecture. This model consisted of two main components: a library which held the software's most used commands and an application which was loaded when the program was executed and in which commands were interpreted. Autodesk has retained the basic architecture of the AutoCAD program into AutoCAD LT, although AutoCAD LT's architecture is more closely related to the logical layer model described in AutoCAD LT's manual. It consists of three main layers: the UI (user interface), display layer, and the Document Content layer. A. The UI Layer The UI layer consists of the UI applets and dialog boxes. The dialog boxes are the primary tool of the user in the application, and are designed to allow the user to create, modify, and manage drawing documents. The UI layer also includes the frame (page) layout that is used to create the document, the tools, the task panes, the status bar, the inspectors, and the crosshairs. B. The Display Layer The display layer provides the images and text to appear on the screen. It is essentially a virtual workspace. It also includes the libraries, which contain data that the user can save. The display layer has four components: Viewports, dock panes, the Work Area, and the Window. A. Viewports A Viewport is a region of the display on which a portion of the application window is "pinned." This provides the user with a fixed region of the screen that will not be resized by moving the window and so can be used to view and manipulate a particular drawing region. In the illustration below, three viewports are shown. Viewport 1 is a red rectangle with dimensions (a) x (b)

Direct X DIA 2D G-code Subversion (Git) Trademark law AutoCAD and AutoCAD LT have a history of disputes with other developers of CAD systems. As of February 2009, AutoCAD/AutoCAD LT (including 2012) was a trademark of Autodesk, Inc. AutoCAD was previously trademarked by Autodesk until 2003, when it reverted to the Autodesk organization. AutoCAD and AutoCAD LT were specifically mentioned in the UniClass filing which was the basis for Autodesk's patent litigation against Unigraphics. The patent claims for the new "appearance and usability" model in AutoCAD 2005 and 2006 had issues with the original appearance of AutoCAD. Inflation has increased the cost of living for those studying at university, but the new student fees have remained static at £9,000 per annum. The increase in the cost of living means that, if the graduate remains in full-time work, they could have paid more than £4,000 for their education in 2017 than they did in 2008. Annual inflation is one of the reasons the average price of tuition fees for a full-time undergraduate degree has risen from £2,401 to £9,000 over the past 11 years. The average student at Cardiff will now pay £5,400 for the academic year, while the average student at the University of Southampton pays £5,200. Inflation has also increased the average price of living in the UK, which will impact many students. The average cost of a typical two-bedroom apartment now costs £733, £25 more than the price paid a decade ago. The price of food is the biggest driver of higher living costs for students, with it expected to cost £715 per year for the next academic year. This includes renting a house for £1,340 and buying a weekly meal at McDonald's for £4.40. The cost of living in Birmingham will be £3,360 for the academic year, and in London this rises to £3,490. However, the cost of living has reduced in Durham (from £3,270 to £3,060) and in York (from £3,540 to £3,390). In terms of average salaries for graduates, the salary they will earn has increased by £2,400 in the UK, which will come in part as a result of increased inflation. However, graduate salaries have decreased in Dublin, where the cost of living has increased, from £2,400 to £2,510. The rise in living costs means a
