1. Field of the Invention The present invention relates to a portable telephone, and more particularly, to a method of controlling a portable telephone having a first user interface mode for controlling the portable telephone by using a user's voice and a second user interface mode for controlling the portable telephone by manipulating a touch-screen.

2. Description of the Related Art The portable telephone is a portable instrument that communicates voice signals, as well as data and image data, through a mobile communication network such as the Global System for Mobile Communication (GSM), Code Division Multiple Access (CDMA), or Personal Digital Cellular (PDC). In order to perform a telephone call, the portable telephone needs a keyswitch and a display for inputting a telephone number and an address, and an earphone and a speaker for outputting a speech. FIG. 1 is a block diagram showing a portable telephone according to the related art. Referring to FIG. 1, a portable telephone includes a display unit 100, a display driver 110, a voice codec 120, a noise canceller 130, a speaker 140, and a microphone 150. The display unit 100 is a liquid crystal display or a Plasma display. A main key provided to the portable telephone is used for entering a telephone number. The main key is a keypad, for example, which may be manipulated by a user to directly enter the telephone number, or by manipulating an array of multiple keys, for example, to input the telephone number using a character input function. The display driver 110 modifies the video signals by using the main key as a controller. The speech codec 120 converts the voice signal into an audio signal by using the microphone 150. The noise canceller 130 removes ambient noise from the audio signal output from the speech codec 120. The speaker 140 converts the audio signal output from the noise canceller 130 into a sound. FIG. 2 is a flowchart showing a method of controlling the portable telephone according to the related art. As shown in FIG. 2, a user first inputs a plurality of telephone numbers to be called by manipulation of a first user interface mode, and receives a list of connection statuses and connects to a selected one of the telephone numbers. Next, the user, while maintaining the first user interface mode, allows the portable telephone to perform a call by a second user interface
