Dec 27, 2014 What's new in the full version of FPSC Reloaded 4.0 so far? Well there is a lot to talk about! First and foremost, the new light version is . FPSC Reloaded v.4.1 : here's what's new since April 7th .1. Field of the Invention The invention relates to a

device for the
manufacture of a plate
from a rotating
aluminum blank. 2.

Description of the
Prior Art The device
according to DE 34 24
931 A1 is intended for
the rolling of blanks or
the like. It includes a
support stand for the
roll over which a
pressing body, in the
form of a roll, is
mounted rotatably. A
rotation motor is

provided for this pressing body. The rolling of the pressing body makes it possible to assure that a sheet shaped product or plate of a predetermined thickness is rolled out of the blank. However, this takes place at a high pressing force and, consequently, high loads are placed on the bearing or the like, which frequently leads to the problem of

a premature failure of the bearing or other components. A shift of position of the pressing body in the roll would result in the roll having to be replaced. For this reason, a device has been proposed, which includes a hydraulic adjusting element and a switching arrangement for the adjustment and, as a function of the position of the pressing

body, effects an adjustment of the pressing force. A disadvantage is that an additional adjustment of the pressing force leads to an interruption of the rolling of the plate. 1. Field of the Invention The present invention relates to a digital television (TV) tuner, and more particularly, to a single-tuner TV tuner capable of automatically

reproducing a program by analyzing a user's voice. 2. Description of the Related Art A digital television (TV) tuner outputs television (TV) channels by receiving a broadcasted radio frequency signal in a satellite, terrestrial,
