What's New In?

Tired of cleaning up after your computer? Duplicate File Finder is the perfect tool to help you identify and delete duplicate files. When you run Duplicate File Finder, the utility checks all the folders you've selected for any existing duplicates. It then presents you with a list of files that are the same as a file you've selected. Simply highlight the duplicate file and choose one of three options from the "Action" menu: Copy, Move to Different Folder, and Delete. Each selection you make will be applied to the duplicate file, and the operation will be performed on every selected file. Other Features: ★ Find duplicate files: Identify duplicate files that exist in your hard drive, including original file name, and size. ★ Efficient: Duplicate File Finder is extremely efficient, it only scans files that are the same as the selected file. And it can delete files much faster than other applications ★ Simple Interface: It has a simple interface, but is powerful enough for users to get things done ★ Highly stable: It uses a technology developed by Microsoft and uses less memory and power, which makes it stable 8.32 Macintosh Utilities - Duplicate File Finder 1.7 Duplicate File Finder helps to detect duplicate files and find the full path of original file, the size of original file, etc., it can help you delete the duplicate file, and moves the file to a different folder.
