## AutoCAD [32|64bit] (Latest)

In 2000, Autodesk introduced AutoCAD LT, a free entry-level version that has fewer features and is less capable than AutoCAD. AutoCAD LT is for Windows-only and is a variant of AutoCAD, using the same file format but a different interface. AutoCAD LT is available in home and student versions. History AutoCAD was originally developed in-house at Corel Corp. The software was originally released under the name CorelDRAW as a dBase-based version of CorelDRAW Professional. Autodesk acquired Corel Corp. in 1996 and later that year, relaunched CorelDRAW as AutoCAD. AutoCAD was one of the first graphical, vector-based CAD programs and predates other CAD programs such as CADsoft's Pro/ENGINEER and SolidWorks by at least ten years. The software was renamed to AutoCAD in 2000 and has had a number of upgrades since its original release. Autodesk relaunched AutoCAD as AutoCAD LT for Windows users and AutoCAD Web App for web browsers in 2002. Autodesk also introduced AutoCAD Mechanical, a version of AutoCAD for the mechanical design market, in 2011. AutoCAD Mechanical was discontinued in 2015,

For example: data = 'This is a test string' Should be: This is a test string How would I go about removing these characters from the string? Is there any way of detecting them in advance and then removing them?
