FAQ

Adlice Diag is a free software solution that will scan your PC and export detailed security reports to VirusTotal, an online service that performs malware analysis on malware samples and publishes the results.

Installation and Setup: 1. After downloading, run the Adlice Diag setup file, then follow the on-screen prompts to install and start the application. 2. After

---

installation, Adlice Diag will start automatically after a reboot. If you don't see it on the system tray, then right-click the desktop icon to launch the application. Main Window: In the main window, click on the button to start the scan. You can see the progress of the scan on the right side of the window, while on the left side you can see the information about the computer and a list of security issues detected by the application.

---

A permalink is generated for each security issue that is reported, and you can share the report with other people.

**Adlice Diag Tips:**

Adlice Diag is a portable application that runs from a removable USB drive and doesn't use the system's hard disk. Therefore, you can create several snapshots of the same image, each time starting from a different USB drive, and store them for future reference. You can also make a full system

---

image from a USB drive. For better control of your computer, Adlice Diag allows you to open a detached session with the application running in the background. If you need to remove the application, you can launch Adlice Diag from an USB drive in "Run As Administrator" mode, or in "Non-elevated" mode to remove it safely. You can also create a full system image from a USB drive. Adlice Diag Features: Advanced

---

scanning algorithm Real-time scanning End-to-end scanning Scan of removable drives and network shares Adlice Diag Known Issues: Adlice Diag currently has no known issues. Adlice Diag System Requirements: 1. Windows 7 or later 2. 1GB RAM 3. 1,25 GHz or faster processor 4. Internet Explorer or Chrome or any other browser 5. 1GB free disk space AeroPeek is a simple utility that, when launched on your

---

computer, will enable you to see all the information displayed on your screen, including your open application, network locations and even recent documents and photos.

At Internet Solutions we believe that you should own, control and manage your own data. We're just like you, but with the experience, expertise, infrastructure, and connections to help you make the right choices for your business. Reviews:

What's New in the?

Adlice Diag is a robust and easily customizable malware scanner that runs

---

an in-depth scan of the entire system, check malicious files, and securely remove them. Simplified malware removal Adlice Diag is a malware scanning tool created with Windows 10 in mind, providing a simple interface where you can scan malicious files and remove them with the click of a button. Remove malware with just a few clicks Malicious files can be detected and removed on a computer system, a

---

shared network, or even on removable media (USB, CD/DVD, etc). The application is compatible with all Windows versions, from Windows XP to Windows 10, for both 32- and 64-bit. A unique anti-rootkit module Adlice Diag includes a unique module to detect and remove rootkits from a Windows machine. It uses an automated engine, designed for the detection of hidden processes, components, and files that

---

are required by the malware. It is able to detect both legitimate and malicious rootkit functionality. No need to be an expert Adlice Diag is easy to use and requires only a few clicks to start the scan, while providing a number of options to customize the execution. If the application is not enough to solve your problems, you can use other options from our anti-malware suite like SpyHunter. Major
