## ASCII Paint [Win/Mac] [Latest]

ASCII Paint is a new paint application designed to help you paint in ASCII or Unicode characters. It is a Windows application, so it may not work for Mac or Linux. ASCII Paint allows you to paint using a virtual paintbrush instead of pixels, which means that you can paint in higher resolutions or larger fonts. In fact, you can even use this paintbrush to paint in any font or size you want! The more you use the paintbrush, the more it remembers the size of the paintbrush. The easiest way to show you how it works is to try some of the images provided. How to use this tool? Use the arrow keys to move around. Press space to stop and release the mouse button to start painting. You can use the A key to switch to a different brush or the C key to change the size of the paintbrush. You can also change the color of the brush with the M key or change the color of the picture with the Y key. The more you use these keys, the more the program remembers their functions. Keyboard Shortcuts: Click on this picture and see what shortcuts are used most often to use the program. Use these keys to use the program. The first time you open this application, a "Startup Wizard" will appear. Make sure to set this application to run on startup. ASCII Paint supports Windows 2000, Windows XP and Vista. However, it has not been tested on Windows 7 yet. Requirements This program is an ASCII art painting tool. You need to have a computer with Windows. ASCII Paint has been tested with Windows XP, Windows 7 and Windows 2000. ASCII Paint may not work on other operating systems, so please do not ask about the compatibility of this application. **What's New in the ASCII Paint?**

ASCII Paint is a very simple, easy to use painting application designed to use ASCII characters instead of pixels. The painted images are bitmap files, so you can use them to create files, passwords, icons, buttons and more. Usage: ASCII Paint uses an ASCII table to convert the selected characters to graphical images. To use ASCII Paint, you must first install a set of default ASCII characters. Default characters can be installed using: - WinZIP - Unzip.exe - GZip.exe - 7z.exe - The ArcGUI font pack The default table includes a wide selection of characters. To use any other table, you can either download and install a new one using: - WinZIP - Unzip.exe - GZip.exe - 7z.exe - The ArcGUI font pack How to: 1. Open the table of characters you want to use. 2. Click the Paste button to paste the characters into the table. 3. If you have only some of the default characters, you must copy a subset of them. 4. Click the Edit button to edit the characters, change their order or delete them. 5. Click the Save button to save the table. 6. The images can now be used to create a bitmap. To do this, use the Paint tool or the ToBmp() method. 7. To use the images created by ASCII Paint, just place them into your project. Credits: - ASCII Paint was created by Mark Steele. - Arnav Gupta is the first person to share the characters in the table and the author of the table used for ASCII Paint. Changes: - The first version of ASCII Paint was released in 2008. - The ASCII Paint Community site was released in 2010. - The tables can now be downloaded and distributed via the Community site. - The program uses the latest version of the ArcGUI font pack. Known bugs: - When using the Copy button, the image to be copied is not properly pasted. - The Save button cannot be used with some tables. Release notes: - Bug fixes. Known issues: - The images created by ASCII Paint cannot be saved as bitmap files (.bmp) or as icons (.ico).
