As a cloud service, Photoshop's integration with Facebook, as well as its mobile apps, lets you edit photos on the go, and also access and access other social media platforms that you sign up for. 1. Click the **Photoshop** icon on the Applications drop-down menu in the upper-right corner of your screen, or from the menu bar at the top of your screen, choose **Photoshop (Windows)** or **Adobe Photoshop CS6 (Mac)**. Photoshop opens and displays a Welcome screen. 2. Click **File** on the menu bar and choose **New** to open a dialog box that enables you to select a photo or other image file. At the bottom of the dialog box, there's a box that enables you to choose a file from your computer's file system. If you select that option, Photoshop will use that file as the basis for all your work, without opening an image in a separate window. If you choose a file in a separate window, a new tab opens in your browser window that displays the open image file. You can edit that image file at your leisure. 3. After you select a file and preview it in the image window to your left, you can drag the image out of the window and drop it on the Layers panel to the right to drag that image into Photoshop. 4. Photoshop offers five main areas of editing: the Image Editing window, Layers, Fill, Effects, and the History panel. You can drag any tool, such as the Brush tool (B) or Pencil tool (P), from the toolbar at the top of the screen to the Layers panel to create layers. 5. In the Layers panel to the right, you see a thumbnail of the image area that appears in the main image window. The image window shows you an actual representation of the image that's on your computer's hard drive. You see a small thumbnail at the bottom of the Layers panel that represents the image area that you're currently editing. That image area is called a canvas, which is a transparent canvas that you can fill with color and other elements. 6. When you click **Layer** on the menu bar, a drop-down box appears that lists all the layers that you currently have on your canvas. Each layer has a thumbnail that enables you to select or deselect layers. In the

“This will be a big win for me for sure,” Albarran said after his team’s 7-3 victory over Bakersfield on Wednesday. “I’m very happy. We’ve been working very hard. This is a positive step. “Finally, it shows the fans that the best team is always going to be up two games to none. We were able to play a solid game and to get a W and hopefully build our confidence up to play the games at home.” The Dirtbags split their two home games with Wichita State last season. A week ago, they edged the Shockers by a score of 1-0. The Shockers racked up five goals in the first five minutes of the contest. Connor Hemmes scored midway through the frame and added two more in the second stanza. Victor Blaszcak tallied one and Paul Ruiz added two more. Bakersfield started to string some goals together in the second half. But, the Dirtbags outlasted the Roadrunners. “We didn’t play for 45 minutes,” Albarran said. “We played a solid first half but we didn’t hit any shots. They scored seven goals against us. “We have to keep playing and having good games. We’re hoping to build our confidence up from last season.” Blaszcak had the Dirtbags’ lone goal on Wednesday. Drew Campbell added an assist and Paul Ruiz tallied two. The Dirtbags held a 28-7 shots advantage in the first stanza. This invention is directed to a cleaning apparatus for the filling line of a semiconductor wafer processing system. More specifically, this invention is directed to an apparatus and method for cleaning between strip processing chambers of the filling line of a semiconductor wafer processing system. FIG. 1 shows an example of a typical wafer processing system 10. The processing system 10 includes an entrance 12 into which wafers are loaded and carried on a wafer cassette. After the process in the first process chamber 16 is complete, the wafer is carried to a third process chamber 18 by a transfer robot 20. The transfer robot 20 carries the wafer into the third process chamber 18 while avoiding any particles
