What's New in the Osmosis?

The ideal solution for short, quick, but precise translations (from Word, Excel, PowerPoint, Publisher, etc.) the program translates your document (or any part of it) word for word. You can use it to read your whole text, or only one document from the list of currently opened files, all without having to open another program for that. Important note: Because reading is performed in batches, it is not recommended that you read too much of the same file. Osmosis Features Osmosis does not require any special database for text reading. It uses the translation database of the system's default reading application. If you have two or more applications installed for reading, Osmosis will use one of them by default. When choosing the desired one by clicking the appropriate button on the application's interface, it will be used for reading. You can read any document from the default reading programs list or, if the application is not installed, any opened document. The reading order will be the same as when it was opened. You can adjust the reading speed and volume of the text as well as change the font color and size. All available features can be accessed through the application's interface (top), allowing to adjust them directly without having to exit the reading application. The application's interface has various navigation tools, allowing to efficiently find the text you need to read. You can bookmark and synchronize your positions when reading using the temporary folder. You can configure the automatic system URLs to skip automatically. Osmosis includes a free web search engine to perform searches using single keywords or phrases. Osmosis is equipped with two different programs for web searching: one for looking for web pages and the other for looking for documents on the web. This allows Osmosis to read an entire page or a portion of it in less time. You can connect the program to a different address in the browser so that the result of the search is opened directly inside Osmosis. Any available bookmark or position of the reading document can be restored. You can turn on and off the automatic synchronizing of your positions with the reading list. Settings You can set Osmosis to automatically skip the automatic web addresses and directly open the URLs you type in the search box. When checking a language you can also select an application that is suitable for that language. You can select the character
