If I click a button on a form and run this code: Private Sub Button1_Click(sender As Object, e As EventArgs) Handles Button1.Click While Not Keyboard.IsKeyLocked(Keys.Left) Application.DoEvents() End While End Sub It runs through fine until I click another button on the form or press a key on the keyboard. I also tried using: Private Sub Button1_Click(sender As Object, e As EventArgs) Handles Button1.Click While Not Keyboard.IsKeyLocked(Keys.Left) If e.Button = Windows.Forms.MouseButtons.Left Then Application.DoEvents() End If End While End Sub But it still runs through, even when I do not have the mouse. How do I detect if a key was released on the keyboard? A: You can use the event MouseEventArgs.Any to detect if any of the mouse buttons was 77a5ca646e
