AutoCAD was designed by Brian Harry (1956-2018), who was one of the first employees of the Autodesk who also worked at the California Institute of Technology. Harry was the lead designer for AutoCAD, and is considered by many to be the father of the commercial CAD industry. Historically, the first released version of AutoCAD, known as Autodesk Project Server 1.0, was released in December 1982. AutoCAD is used by architects and engineers, CAD operators, marketers, and students. It has more than 750,000 users and 10,000,000 software licenses sold every year, and has been used to design or modify buildings, bridges, tunnels, vehicles, industrial machinery, bridges, ships, wind turbines, rockets, and aircraft. AutoCAD is used worldwide by professionals and students. The latest version is AutoCAD 2020, and it was announced in September 2019. Autodesk was acquired by 2.0 billion in 2013. It has operated as Autodesk since 2012. History 1980s In 1980, Autodesk, Inc. was founded by Brian Harry and Herb Karp as the first commercial CAD company. Karp and Harry had previously worked at the University of California, Berkeley's Computer Graphics Laboratory, where they developed the RenderX image-rendering software. AutoCAD was introduced in December 1982. In 1983, the company opened offices in Cambridge, England, and the staff grew to 25 people. In 1985, the company moved its headquarters to San Rafael, California. In 1984, the company held its first conference, the International Autodesk Conference, in San Francisco. This conference was intended to give users a chance to interact with the software and find out about developments. The first CAD software to integrate both drafting and design capabilities, like other desktop CAD programs of the time, was released in 1985. The main feature in this version was support for a mouse interface, allowing users to draw with the cursor. The object-drawing capabilities of the program were new and important. In 1986, the firm began to use the brand name "Autodesk". AutoCAD version 2 was released in 1987. In 1988, Autodesk Inc. became a privately held company, with shareholders of the firm taking up to 49% equity and debt of 51
