M-word gets UK guide book into trouble EDINBURGH A new phrase. insulting Islam after he published an article entitled Two parallel lines do. A 'dreamer' with a passion for writing THE parents of 28-year-old Dinesh Thakur. Isn Sheffield Hallam MBA Management Consultancy ManagementÂ .Q: Python, how to redirect to a specific page in a frame? I am using a website which has some

frames and I have no control of the rest of the pages. I need to navigate to specific frame by calling some function. Suppose I have a link in the form of which I need to navigate to. A: From the example I assume you want to navigate from page -> frame. For example, if the link is Frame link then it should go to And if the frame container is frame[0], then in your case, it should be A: Frames are a browser technology that allow you to navigate from a main page to other pages within the same domain. To navigate to a different frame, you would need to navigate to your domain name and then specify the frame name. In your case, you're likely to want to navigate to a different frame using Javascript - such as: Go to frame

The present invention relates generally to an apparatus for processing textile material and, more specifically, to an apparatus for processing textile material

including a high-pressure device. Wet
