## Anvi Rescue Disk

■ ★ Anvi Rescue Disk is a bootable Windows tool that will save and repair your computer when your system gets infected by ransomware. ★ It can be used to fix malicious boot-sector viruses, that are also known as Ransomware, the ones that restrict the access to an infected computer and ask for a ransom to decrypt it. ★ It will also check and remove malicious Windows Registry. ★ It will also check and remove malicious Windows temporary files. ★ It will also detect and delete dangerous viruses and worms. ★ When the ransomware attack has been detected, it will ask you to save and repair your infected computer. It will then restore your computer to a safe state where all your personal files can be fully accessed. ★ Anvi Rescue Disk will notify you every time there is an improvement, as well as every time your computer is back to normal. ★ It is designed to be used alongside your regular anti-malware applications such as SuperAntispyware, Malwarebytes, CCleaner, and many more. ★ It is compatible with every Windows OS and with a number of different bootable CD / DVD and USB devices. ■ ★ Anvi Rescue Disk can be used to save your computer from the virus attack and restore all the original configuration. ■ ★ It can also perform a full system scan for the known viruses and remove them all. ■ ★ It has a friendly GUI and offers advanced features, such as Scheduler or the capability to scan or repair whole partitions or individual files. ■ ★ It can also export the whole Windows Registry so that the user can restore the registry if required. ■ ★ It will also provide a full backup so that the user can restore the whole computer even if everything has been deleted. ■ ★ It can also create a bootable USB that will boot your computer into a safe mode environment so that you can perform a repair of the computer. ■ ★ It will also support a wide range of languages. ■ ★ It can create self-extracting archives so that you can easily save the application and use it on any computer that you have. ■ ★ It also offers an executable archive, so that you can customize the application to run in Windows 2000 or later. ■ ★ It is compatible with every Windows OS and with a number of different bootable CD / DVD and USB devices. ■ ★ Anvi Rescue Disk is a reliable tool that will save and

## What's New In Anvi Rescue Disk?

Anvi Rescue Disk is a utility designed to save and protect your computer from malware. It can scan your computer and detect any infections. After scanning, it enables you to restore the damaged registry and systems files. It also creates a bootable CD or DVD that can be used to fix the registry or system files on a Windows PE environment. Download Anvi Rescue Disk from the link below and burn it to a CD / DVD Install Anvi Rescue Disk on your computer and boot from the CD / DVD. Click on the “Troubleshooting” option to start the troubleshooting process. You can click on the “Help” tab to get more help. Thank you for your interest in Anvi Rescue Disk! ]]> Fri, 08 Mar 2016 16:19:47 +0000 Buds is a application that allows you to remove stickers from your windows. You can apply them to your computer to create personal decorations. It can be also used as a screen saver, but the main function is to remove stickers from your computer screen. As a screen saver, it takes all of the decorations off your screen except for the ones that you add as stickers. But it's useless if you're looking for a screen replacement or if you want to create some more decorations. Bubble Buds can remove all types of stickers. They can be any shape or size. The application can also put them on any location on the screen. Just remember to make sure that you have enough space on your computer hard drive. As far as the removing of the stickers is concerned, you can select the type of picture that you want to remove. You can also select the transparency and the size of the sticker to be removed. If you want to remove the stickers in groups, you can do so by selecting a container to hold them. The application has a preview mode to check the position of your stickers. You can move them around if you want. After you remove the stickers, you can save them on a file to reuse them again or you can delete them. You can even compress the stickers and put them into the same folder. Considering all of the above, Bubble Buds is a valuable screen saver to be used on your computer. The application is easy to use and the stickers that you add will be easy to remove. It is also possible to save the removed stickers on the computer hard drive. ]]>

## System Requirements:

To function properly, DiscCraft requires a fairly beefy computer system. Please note that there are limitations on the graphics settings available, and the HD version of the game will take up significantly more space on your hard drive. DiscCraft runs in a custom built virtual machine, and will only run on Windows 2000, XP, Vista, and Server 2003. While the game will run on Windows 7, we don't have any plans to support this at this time. For full details on the minimum specifications required for the game, please see the wiki's "Minimum System Requirements"
