Lean tools can be a big help to any Lean-transformation. Translean Activation Code is a comprehensive collection of an array of Lean-tools and templates that can systematically reduce waste and cycle time in any process (service and manufacturing). Interactive worksheets are included that cover: - Spot-Waste-Assessment, - Value Stream Mapping, - Kaizen-Ideation and - Kaizen-Inspection Exclusively, Translean includes the "Kaizen-Learn" collection. It gathers a set of self-solving an example Kaizen-document. Load-Leveling (Heijunka) is a process for simultaneously eliminating staff and flow-time from any process, so it can achieve drastic reductions in cycle-time. And it is a set of tools which can provide measurable cost reduction and improvement in your organization. But, in order to do Heijunka, it is necessary to find "Trifecta" holes. You should consider: - Flow-Time - Staff - Cycle-time The

---

worksheet will help you to do a performance analysis so you can assess and analyze your process based on flow-time, staff and cycle-time. It is a simple yet powerful set of tools that can provide measurable cost reduction and improvement in your organization. "Trifecta" holes are the best time saver in your organization. These are the 3 basic elements that can improve your process and reduce cycle time. - Flow time: In your organization, do you spend a lot of time on "INACTIVE"(non-productive) activities? - Staff: In your organization, do you have vacant time and staff in excess? - Cycle time: In your organization, are you cycling too much activities between steps or employees? The worksheet will help you to find and effectively reduce Trifecta. Exclusively, Translean includes the "Kaizen-Learn" collection. It gathers a set of self-solving an example Kaizen-document. Waste-stream mapping is a process for understanding the best function of your staff and the best allocation of their time and activities. The worksheet will help you to do an activities-breakdown from your existing staff members based on their areas of expertise and their contribution to your organization. A Kaizen-Template can be a very powerful tool in a Kaizen event and can provide you with useful metrics and data to make measurable

More about the book and the author at Amazon: How to Find a Product/Market Fit What's your target? Do you have something specific in mind that you are after? That you wish to succeed for? This depends on how you define product or market fit. There are several explanations of

## What's New in the Translean?

Translean is a collaborative process for reducing waste and cycle time. It can be started with or without detailed process-blueprint and it can operate by teams, individuals or companies. It targets process- and service design and encourages process improvement. Translean is based on Lean principles and tools. Lean is a management-practice that aims to eliminate waste (or any excess in any process) and provides us with valuable management-tools. The waste-patterns and cycle-times in any process can be identified by the use of the Translean-Worksheets (Ranking-cards and Card-Tables), followed by an objective-analysis, which reveals the causes of waste and cycle-time. These are then used to redesign the process from the top-down, from the value-chain. Translean can be of great use for companies that are trying to improve their processes and are interested in the launch of a Lean-project. It should be interesting for large companies that are not keen on running Lean-projects, but are interested in finding and recognizing waste (or any excess) in their processes. "At all events once you are discovering in what ways you try to make the people understand this, you will get to the end that most of the time they don't understand this at all, but simply lack the knowledge how this is to be done."
