It does not require you to modify your browser's cookie settings, visit a web page, or use a proxy to start the program; it detects the browser on its own when it is running. Ip-Harvester works on the basis of the highly-effective Ip-Harvester algorithm, which is implemented in the code itself. It sends pop-ups to the user desktops, and has been tested on any Windows platform from Windows 2000 to Windows 8. To make sure there are no problems with the program's execution, it was tested on 32-bit and 64-bit platforms. In the future, Ip-Harvester will offer intelligent pop-up targeting to deliver even more relevant pop-up advertisements.
