Facebook Password Recovery Activation Code

Facebook Password Recovery Serial Key is a small utility built specifically for helping you recover lost or forgotten passwords for the social networking site, Facebook. It supports the following web browsers: Internet Explorer, Mozilla Firefox, and Google Chrome. Its main goal is to make the process of recovering lost passwords as easy as it can get, while allowing its users to recover the passwords without providing login and password details. In order to carry out this task, Facebook Password Recovery requires only a few mouse clicks. Once the software is installed, the users are able to pick the “Recover Passwords” option and only a few more clicks are required to get the information back. In order to recover Facebook passwords, the software displays the login page. It creates a new browser instance that loads the site’s login page. Once the users are logged in, the program displays the list of the accounts stored by the web browser. The application can recover passwords in the following formats: • Facebook (accounts and usernames) • Microsoft (Windows Live and Hotmail) • Yahoo (accounts and usernames) • Google (accounts and usernames) • Twitter • MySpace You can perform the recovery process manually or in batch mode. When working manually, the application analyzes the necessary info and starts the recovery process. The interface allows the users to choose which accounts they would like to recover, and the level of data recovery. A specified number of pages are displayed at the end of the process. During the recovery, the users are able to select a desired web browser. As soon as the recovery is finished, you can copy the information from the clipboard and paste it into other third-party software. With Facebook Password Recovery you can recover the following data: • Gmail (accounts and usernames) • Facebook (accounts and usernames) • Hotmail (accounts and usernames) • Live (accounts and usernames) • Windows Live (accounts and usernames) • Google (accounts and usernames) • Twitter (accounts and usernames) • MySpace (accounts and usernames) The application is licensed and priced per 1 computer license, with a 30-day trial available. It can be downloaded for free at the official website (link in the top of this page). For further information about the program and how to recover

What's New in the Facebook Password Recovery?

Facebook Password Recovery is a lightweight Windows application built specifically for helping you recover lost or forgotten passwords for the well-known online social networking service, Facebook. It sports a clean and simple GUI that gives users the possibility to retrieve the lost passwords with only a few clicks. Facebook Password Recovery offers support for the following web browsers: Internet Explorer, Mozilla Firefox, and Google Chrome. Of course, the program is able to recover the passwords, provided that they have been stored by your web browser. Basically, it proves to be extremely easy to work with this tool, as you only need to hit the "Recover Passwords" button, and the application automatically scans the web browser for the needed information. At the end of the task, the application reveals information about logins and passwords. Since there aren't any configuration settings, even less experienced users can master the process with just a few clicks. What's more, you cannot save the information to a file, but you can copy the details to the Clipboard and paste it into other third-party applications. During our testing we have noticed that Facebook Password Recovery carries out a task quickly, and no errors showed up throughout the entire process. As it would be expected from such a small software utility, it remains light on the system resources, so it doesn't hamper computer performance, nor interfere with other programs' functionality. To sum things up, Facebook Password Recovery makes the recovery process seem nothing but a child's play. It can be easily configured and installed by all types of users, regardless of their experience level.
