
Kotor 2 Female Head Mods

This mod replaces the Jedi robes in Knights Of The Old Republic 2 with unused robes from KOTOR 1 Light Side Ending (NPCs Jedi Crowd). It includes: 2 women's, 3 men's and 1 children's. They fit true to size. As in the original, they can be white, red, blue and dark blue. In my opinion, they are more attractive than the original clothes of these Sith. They still include new effects (added armor, new skin color, new lightsabers), but also a new robe model. They are quite beautiful and suitable for both male and female characters. They also feature a new color palette.
