Python: getting string between
next pair of ". I have this string:

`my_string = "" the quick brown "`
`wolf""` I want to create new string
having all the text but only
between and next occurrence of `"`.

My target output for `my_string`
should be: `my_output = "the`
`quick brown wolf"` Thanks A:

Let's face it, there's only so much product that we can sneak in and have it fly out to Texas. I know so many local guys that would love to handle the shit, but I just don't have time to do

that. At least not right now.
Steven: Yeah, but you have time
to do you, right? Dan: I have
