Quick Recovery For Lotus Notes [Latest] 2022

Quick Recovery for Lotus Notes is a do-it-yourself non-destructive data recovery software. It is specifically designed to assist you in recovering deleted or damaged Lotus Notes mail items from your Lotus Notes databases. There are just two steps to perform the complete operation. Analysis, Select & Save. Analysis is the most important aspect of data recovery. Quick Recovery's unique Guided File Excavation Technology (GFETCH) helps in locating files and folders lost behind overwritten partitions too. The Analysis Process There are two types of analysis: Automatic & Manual. First you need to select what type of analysis is required. After selecting either Automatic or Manual, click on Next button. Now, click on the Folder or File and press the Select button. The Selected Folder or File will appear on the Tree Menu. On your Next move, you can either open a copy of the deleted file or folder and perform the analysis. This step is important as you need to open all the deleted items. The Analysis will process all the deleted items in one go. Once the analysis is completed, you can simply select Save. This operation is like a boot process. Save the analysis output and you can continue with the rest of the process. Manual Analysis The Manual analysis will proceed as follows: It will show the complete list of file, mailbox, address etc. The files you selected on the analysis will appear on the top of the list. You can select each file/mailbox/address and click on Next button. After the Next click, the selected file will be displayed as a separate folder. You can delete that folder. For information, Quick Recovery for Lotus Notes is a zero footprint data recovery software. This means that, it never makes any changes to the file system or to the database. In addition, it is a Non-destructive Recovery software. It doesn't affect the original or the backup files. This means that, this tool will not remove the original files or any of the backup files. Benefits: • Fast and highly efficient recovery. • The program does not make any changes to the file system or to the database. • Quick Recovery for Lotus Notes is 100% compatible with Windows 98, Windows 2000, Windows XP, Windows Server 2003, Windows Vista and Windows 7. • It's the best and most effective tool to recover lost files from multiple storage devices including flash drives, floppy disks, external hard disks
