

Tecaudio.bat Gta Vice City Mediafire

March 17, 2012 - In the GTA:VC folder if you have an MS-DOS batch file named "TecAudio", right-click it, select "Edit" and delete the line that says... " #2C3D1F9". When you do this, your computer will play again with the Sound Blaster Live! Virtual CD. Note. If you have an MS-DOS "TecAudio" batch file, delete the line in it that says "#2C3D1F9". All of these steps work with the VC version of Windows. For other versions of Windows such as Windows XP and Windows Vista, if you still have them, you need to replace the "#2C3D1F9" line with your own. Don't forget to backup your audio.
