LingvoSoft Dictionary English - Persian (Farsi) Keygen Full Version

LingvoSoft Dictionary English - Persian (Farsi) is a program that you can use to translate any word from English to Farsi and viceversa. The interface is simple, comprising a customizable toolbar and three sections. The first one displays all the dictionary entries in alphabetical order. The second one is designed to

let you view all the available translations and word explanations, while the third pane is designed for word search. Clicking on any word in the dictionary displays its translation in Farsi. If you want to find a word in the dictionary, you just have to start typing it in the search box and you are automatically guided to the corresponding database section. Furthermore, you have the possibility to use the predefined filters in order to find certain word categories. One interesting feature

is that you can customize the dictionary by adding new words to the database. In this case, you have to specify the word gender, grammatical category, transcription and, of course, its translation. A comment or sample can also be added. But this program is not a simple dictionary where you can find individual words and their Farsi correspondent. It is capable of finding synonyms and word variants and easily translates whole texts, allowing you to copy the output to the clipboard. Including more than
