Get trained on how to correctly adjust camera settings for all types of light. Easy-to-use interface that will get you the results you want. Choose a set of 5 pictures from 10 different locations and the program will help you make all the exposure settings needed for each. Extract photos from the location you choose and save them on your hard drive. F-Stop: f/5.6 Shutter speed: 1/125 Exposure time: 1.8 sec EV: 0 Tripod: Yes Camera: Pentax K10D ISO: 100 White Balance: Auto Latitude: 35° N, Longitude: 65° W Tripod: On Tripod Size: 1” Scene Type: Landscape Facing Direction: East Facing Direction: North Facing Direction: South Facing Direction: West Tripod Mode: None ISO Range: 100-1600 ISO Range: 800-1600 Image Type: RAW Digital Zoom: 10 Auto-Zoom: No Auto-Zoom: Yes Image Stabilization: No Camera: Canon Rebel T3i Camera: Nikon D3100 Camera: Panasonic Lumix DMC-TS3 Camera: Sony DSC-HX100 Camera: Olympus E-3 Camera: Phase One Backyard Camera: Nikon D7000 Camera: Samsung D50 Camera: Sony DSC-HX100 Camera: Olympus E-10 Camera: Sony DSC-W100 Camera: Nikon D40 Camera: Canon EOS 5D Mark II Camera: Leica M8 Camera: Sony DSC-W70 Camera: Leica M8 Camera: Nikon D7000 Camera: Canon Rebel T3i Camera: Nikon D4 Camera: Nikon D3200 Camera: Canon T2i Camera: Sony DSC-H10 Camera: Nikon D3200 Camera: Nikon D5500 Camera: Canon EOS 5D Mark II Camera: Nikon D3100 Camera: Canon EOS 5D Mark II Camera: Canon EOS 5

What's New in the?

Let’s start it off with an overview of the app’s interface. We will then get to the main function of the app – it’s the Exposure Wheel. This section will give us a close look at the Exposure Wheel function and how we can use it. The main window of the Training Photography Exposure Wheel. The tool, which is very straightforward, has a very simple interface and design. It is divided into four areas – The Light Meter, the Exposure Wheel, the Thresholds and the Log. The tools and functions of the app will be explained in more detail. As shown above, there is a Light Meter, Exposure Wheel and Thresholds. The Light Meter shows the brightness and the color temperature of the outdoor lighting. It also shows the lighting contrast. It consists of a slider and four presets. The slider allows you to choose between the light meters, which are calibrated for daylight and fluorescent light. Once the light meter is selected, it has four presets. The presets are as follows: Daylight Cloudy Twilight Artificial The other areas of the app show you the reading of your camera when you select the light meter with the settings “Daylight”. You can also select the reading of your camera when you choose the preset “Artificial”. The Exposure Wheel shows you how your light meter or camera measures the intensity of light. The wheel has 10 different settings that you can adjust. If your camera is set to “Auto”, the camera will adjust to the best possible settings. However, if you want, you can manually adjust the settings to the best possible settings for your specific situation. With the settings “Auto”, you can choose from the following: Normal Sunny Overcast Shade If you have a DSLR camera, you have the following settings: Sunny Overcast Shade If you have a camera with the “Auto” setting, the camera will automatically adjust to the best possible setting. You can choose the settings from the following: Sunny Overcast
