Convert your keyboard macros to GPO's (General Purpose Objects) and open them with a point and click! KeyMACRO can convert your macros in Excel files, Access files, PowerPoint files, OpenOffice files, Thunderbird mail files and in any other text file. ORGANIZERS Description: ORGANIZERS is a powerful, easy-to-use application that allows you to quickly store files and folders in your computer in a way that you can find them easily. Tired of managing a huge amount of files scattered on your hard disk? Then Organizers could be just what you need. Organizers has an integrated file manager that lets you browse through all your files and folders in a simple and easy way. Just by starting Organizers, you can choose which file system to use for each folder: either FAT32, NTFS or EXT2, for example. Then, create and rename folders and subfolders, assign an icon to each folder and keep track of its contents by associating their extension. Organizers will suggest the most suitable icon for each file/folder type by analyzing the extension name and by searching for icons of similar extensions in the current user's icon library. By selecting one of these recommended icons, the file/folder icon will be updated on the fly. You can even modify the icon's attributes, such as its size, color, transparency, its position on the left or right side of the window, and its shape. You can even create your own custom folders, use several user's icon libraries to store different themes or keep track of the files and folders you edit and modify frequently. When you add new files, Organizers will automatically create a subfolder and assign it an icon. You can also delete and rename files without removing them from the Organizers database and your icon library. Organizers' internal database stores all the information about each folder/file including its icon, type, size and date of last modification. Organizers supports all the most commonly used file types, and it can import/export information from/to other applications that use databases, such as Quicken. No matter if you're using Windows 95/98/NT/2000/ME, UNIX or Linux, Organizers will work the same in any system. It even runs on MacOS X, making it an universal file manager for all your computers.
