Wednesday, September 9, 2015 Club Penguin® Snow White I thought it was time to add a "club penguin" to my list of members. I love the humor of the fox in the game. So I created a club penguin myself. They even had a snow white dream. He is a snail club penguin dressed as Snow White and his name is stuart. He loves to run and they can be found on the street. Click the image to see a longer version. I do have a lot of projects in the works and will be posting some here. It is only September and I only have a couple more weeks to finish everything up before it is time to do an October birthday. This way I'll have loads of time to catch up on decorating the rooms. About Me I have been a paper hound from an early age. I love being creative and I love books and scrapbooking. I have recently started making jewelry and have aspirations of learning how to knit. I am a strong believer in Jesus Christ and I am a proud member of the Church of England. Quotes I have a quote for every day of my life. I'm sure my mother would laugh. That's what's important. A kindness began to grow in me. While not yet born, it was growing in me. Suddenly I felt warm inside. Then I heard God's voice say, "You are my son; today I have begotten you." I love my wife with all my heart and I believe that when I was conceived, I was made alive.Q: Do I need an auto-import module just for using __dict__? If I have a package with no auto-imports, do I need to import a module to use __dict__? Do I have to include that in my __all__? I understand that __all__ can be used to import modules, but the point of the question is: do I need to include __dict__ in my __all__, since I wouldn't be accessing anything in that module even if I did
