What's New In Adobe Photoshop 2022 (Version 23.0.2)?

1. Field of the Invention The present invention relates to a

centrifuge and more particularly to a centrifuge having a frame, which is supported rotatably by appropriate bearings and is provided with a plurality of centrifuge buckets or cells to receive any kind of solids or materials to be subjected to centrifugation. 2. Description of Related Art Typically, a centrifuge as described above includes a support for the frame to allow the frame to be rotated around its own central axis. A motor is provided as a driving source

for the frame, which can drive the frame to rotate, and a mechanism for retaining the frame, which is driven by the motor to rotate. A well-known example of the mechanism for retaining the frame is a mechanism for preventing the frame from rotating in the reverse direction. There are many other examples of mechanisms for retaining the frame. For example, the frame of a disc-type centrifuge may be fixed on a rotating shaft of the drive

motor by a force-transmitting mechanism, such as the planetary gear system, while the frame of a conical-type centrifuge is fixed on a rotating shaft of the drive motor by a bearing assembly which may be simply a race ring and a plurality of balls, which roll between the race ring and the frame. For example, U.S. Pat. No. 3,865,691 to Ramsdale, U.S. Pat. No. 5,078,374 to McRae, and U.S. Pat. No. 5,458,199 to McRae disclose disc-type centrifuges, each comprising

a mechanical system for maintaining the frame in stationary rotation. It is, therefore, desirable to combine the above-mentioned well-known frame-retaining mechanism with a mechanism for preventing the frame from rotating in the reverse direction.Q: Adding details to a list element in my unordered list I have an unordered list as follows: Product Image Product Title Product Details Product Price I am trying to add details such as each
