nickb ===== pedalpete I understand the 'how' of doing an SQL injection, but I have never had the motivation to do it. Yes, as a developer you can take precautions, but I am not sure if my web applications are a target for SQL injection. I do think we need to look at what we can do as a consumer of web-sites,

but I'm not sure how this relates to the author's point, or could we use this as reason

for a possible flaw in a website? Edit: I don't mean to be negative, I'd just like to understand more about how SQL injection occurs and if I should really be worried. ~~~
henning I'm not sure whether you realize or not, but SQL Injection is by far the most common injection vector out there. -----
menloparkbum He did not demonstrate any examples of sql injection in his code. ~~~
DannoHung Which is good, because most of the things people say "SQL Injection" are just resulting in a bad query
