Description: Udemy - Data Protection Basics By Bridget Anderson One of the most common questions asked is "How can I securely protect my data on a device?" I'm excited to let you know that all iPhone and iPad users can now protect their personal data using Apple's new File Vault app. This app for Apple is available for all iPhone and iPad users, with no Apple ID required. The File Vault app

allows you to backup your personal data to a password protected secured iCloud account. You can choose to backup your personal data to either Apple iCloud or to any folder that you can access on your iPhone, iPad or iPod touch. By using File Vault, you can access your data from anywhere in the world, no matter where you are. You can also share these backup files with others. How does File Vault work? Here's how File Vault works - In the File Vault app, you can create a free 5 GB iCloud account (the maximum amount of data you can backup), which is completely optional. If you use this, it will secure the backup files for you and the files will be stored encrypted on iCloud and only accessible to you. There
