Collecting this data for the real-life player test was a huge undertaking for the engine team, with 2 or 3 cameras capturing the motion tracking data and conducting analysis on this data to extract points of impact. The motion capture data collected is then sent back to the engine team, who build the data into gameplay. This allows FIFA 22 to create more realistic collisions and more realistic player actions. Although one would think that motion capture data on tackles and other player impacts is extremely valuable to the in-game engine, collecting this data during the creation of the game turned out to be incredibly valuable. With the motion capture data captured during gameplay in high definition, the engine team was able to make sure that the game tracked how those parts of the game play, even at full motion capture intensity. "The results were incredibly important when we were creating FIFA 21," said Robert Poole, President of EA Sports. "We knew the engine had a handle on ground ball recovery, the player's running mechanics and skills, ball spin, where the player is heading and what actions he is taking, but we could not be sure on higher level events like tackles, aerial duels and on-ball actions. "This was a very difficult test," Poole added, "but it allowed us to get a handle on these important aspects of the gameplay, to enable us to finalize the game and create a solid foundation for FIFA 22." FIFA 22 also features the game's first user-definable Player Trajectory and On-Ball Behaviors - meaning that the game reacts to the movements and interactions with an opponent even if the player is not directly in contact with the ball. This allows the game to react to both in-game interactions with an opponent as well as off-ball actions, which requires the player to move and respond, even when the ball is not in their area of control. Since FIFA 22 includes over 2,400 new animations, as well as new conditioning and injury physics, and also comes with the implementation of the new Index system, the engine team had to be able to predict the impact on gameplay when all of these enhancements are taken into account together. "The engine team was able to create, in short order, an incredible engine architecture that captured and predicts the impact of every animation

on the game,” Poole said. “We were able to create

FIFA is the world’s game. FIFA is a family of soccer video games. There have been FIFA games for PC, PlayStation, Xbox, Wii, and mobile since 1993. FIFA is a game that gives people of all ages, genders, and backgrounds a chance to play the beautiful game. No matter if you’re a lifelong soccer fan, a beginner player, or a casual pick-up, FIFA provides a fun and engaging experience. Who am I? FIFA is the game I know and play every week. I am a real-life football fanatic. I’ve played FIFA since FIFA 98 and have been a part of the FIFA community for years. This year’s FIFA community is an ever-growing group of loyal and passionate footballers from around the world who come together around these annual releases. I’m here to connect with each and every one of you and share my experience

through this shared hobby of mine. What I love about FIFA The first thing you notice about FIFA is the spectacular soundtrack, which is easily one of the best parts of the game. Thanks to the Simlish language created for the game, everything in FIFA is immersive and easy to understand. And as a result of this, the game is fun no matter how much you're into the game. FIFA's simulation engine is second to none. Every bump, collision, and tackle perfectly replicates the physicality of the sport. Each player learns and grows, and you can enjoy the thrill of witnessing your favorite athletes come to life. The game seamlessly transitions from one mode to another without a hiccup and lets you take on any opponent at any time. With that said, there are plenty of ways to play FIFA. In fact, there are more than 20 different playable modes in FIFA. If you have a week without a FIFA game, you can easily find something to enjoy. The game constantly evolves. Each year offers new content and features for you to enjoy. The most notable additions over the years include Player Impact Engine, Dynamic Shot Control, Ball Mastery, Improved FM Classic, and more. What I'm not so fond of While the game does feature its share of glitches, there are more annoyances than you can shake a penalty stick at. The modes in FIFA can bc9d6d6daa

What's new:

- **New League Kit.** Football kits may have the most visible, unique features, but there is so much more you can do with the choice of kit. From the depth of the number on the back of the shirt to the type of boot your player is wearing, the kit of your favourite team offers a visual treat. In FIFA 22, the kits won't look the same in every game mode, as each mode offers a unique set of shirts, shorts and shoes for the players, guaranteeing that you'll look great in action.
- **New Free Kicks.** FK's will have an incredibly varied range of movement patterns in FIFA 22. This means more than just guessing where to place a direct free kick. Executing a free kick in FIFA 22 means combining the right timing of player movement for a high line kick or accurate dart into a tight angle for a low shot. Ranging to short on the ground and over the wall, dipping and weaving around your marker and bomb it off a set piece in an abundance of variation.
- **New Tactics.** In FIFA 22 you'll be able to swap tactics at any time in a specific game. That means you will always have the opportunity to use the best tactics available for the current situation. For example, swapping to a 3-4-2-1 for a one-touch game against Barcelona - the absolute powerhouse of the league.
- **New Defenders.** Fifa's tackling engine has been carefully rebuilt, with a new

dynamic weighting to account for how players are jumping and tackling as they close the gap on opponents. New tests have been added throughout the player arsenal to build up a deeper understanding of how the game should behave. This tighter connection between the player actions and the engine, allows for more successful and unpredictable defending.

- **Crossing.** Crosses now have a more player-controlled timing and can be used to set up the offside trap. Making your opponent defend and opening up more space in the middle of the pitch.
- **FX Boosts.** New animations for the cross, wall pass, direct free kick, high line, corner kick and low shot. Activate a new dynamic combo system and see how the new animations change the feel of the free kicks.
- **FIFA GamePlay**
 - **Goalkeepers.** Players are now more agile and have sharper

FIFA's football simulation boasts more than 15 years of gameplay innovation with the FIFA experience still evolving. The most recent FIFA launch, FIFA 19, made a big change to make defensive play feel more realistic, whilst also providing a more intimate experience through improved tactics use. With the release of the newest feature, FIFA 22, our goal has been to create the most faithful football experience that matches the skill and speed of real football. Simulation is at the heart of the FIFA experience, giving you the tools and the platform to bring your own unique ideas to life. Our latest update for FIFA 22 delivers fundamental gameplay changes, combining brilliant AI with smarter decision-making by players to make the most intuitive and authentic gameplay experience yet. FIFA 20 introduced an all-new player momentum system that revolutionised the way players controlled the ball. You can now control all of that momentum in FIFA 22, with an intuitive and easily navigable system that is easy to understand for fans and true to the pace and style of real football. FIFA's comprehensive feature set is always growing, and this is evident with the FIFA 22 update, where you'll find a wealth of new gameplay elements, improved graphical fidelity and a host of other improvements. Also, don't forget to check out the FIFA Ultimate Team features for all your FUT Manager rewards. How does EA SPORTS™ FIFA 22 work? The ball can only be controlled with one foot at a time, just like real football. Passengers are now able to experience the joy of real-life football as you can control the ball with both feet. This allows players to vary their play style and approach the ball from different angles, just like the real thing. On-pitch action is being brought to life with new intuitive gameplay features and advances that result in an authentic and rewarding football experience. In FIFA 22, players are under more pressure throughout a game; they are more aware of the opposition and the game play has been enhanced to keep up with the intensity of the sport. FIFA's innovations in AI have evolved even further to become smarter in real time as new team-based strategies have been developed to create a more realistic and thrilling competition. FIFA 22 brings a step change to make it easier to score and harder to defend in FIFA Ultimate Team. Simply put, it's easier to score goals and harder to stop them. FIFA Ultimate Team continues to grow and evolve in FIFA 22 and more than 19 million players are already enjoying the
