Apply for Visa .Q: Function loses arg when assigning it to data frame This script does not work because the function returns the default of the R data type (here it is 'list') myFunc # 2 # 3 # 4 # 5 # 6 I have solved this problem by doing the following: myFunc # 2 # 3 # 4 # 5 # 6 But still wonder why the first script does not work as it should. I can invert the problem and get the function to work when assigned to a data frame row: dat and dat # 2
