Tip If you work on the Internet, don't overlook Adobe's WebReady program. It's a superb choice, and it can deliver a website for you quickly and easily. Adobe's PhotoDVD is a little more involved than the others, but it's another alternative to PhotoShop and FreeHand. With this program, you can burn DVD discs, including those with video clips, photos, and audio. You can watch the contents of the DVD as slideshows or play the discs in a computer or DVD player. # Author's Tips for Photoshop Here are some tips for using Photoshop with the manual stuff: \* The Help menu provides detailed information on features such as crops, pixel integrity, healing tools, and toolsets. \* Before you edit a photo, make sure that you're set up properly. Find the Icons & Toolbars tab on the Edit tab to make sure that you're using the correct settings and tools (see the next sidebar). Also, if you're going to edit a huge number of photos, consider using Photoshop Elements' Import, Edit, and Save As commands (Ctrl+I, Edit→Import, and Edit→Save) as a first step. You can then select the file type you want to create and save it. The same goes for building a library of images in Elements' Organizer. See the next section for details on that task.

Please note that although Photoshop Elements and Photoshop are very similar programs, the two share very few things. They should not be confused. The differences between Photoshop and Elements are subtle, but may seem confusing at first. Don't worry, though; it is actually quite easy to learn, and it doesn't take long to master. Once you have mastered these two programs, you will not want to use anything else. Why do you need Photoshop? You may think: "I don't need Photoshop to edit photos. I've got good eyes and my camera doesn't have a time-lapse feature." When you capture an image, you have a limited amount of time in which to make your decision. If you can take a photo in seconds, your decision is easy. However, sometimes it takes a lot more time to make your decision and take the photo. You may be waiting for rain, for a light to change, or for a moment of sun. Photoshop is invaluable for photographers. Photoshop is useful for creating abstract images and stock photos. Photography made simple - Snazzy Photo Tutorials YouTube Some images are more difficult than others. If you can't decide whether you want a certain type of photo, for example, you may want to open a version of the original image in Photoshop to compare it to your other images. Sometimes it is best to create several different versions of an image and see which one looks best in your head. However, some images are

more difficult than others. Photo manipulation and retouching of photos is fun and has become increasingly more sophisticated. Photoshop allows you to adjust the shape, color and size of an image, just like in real life. You can also create beautiful effects like brushes and textures in Photoshop, which is a great way to add interest to your photography. Many professional photographers use Photoshop as a tool to improve their images, to create "cheese-paint" effects, or to retouch their photos. Because Photoshop is used for such complex tasks, most photographers don't bother to learn basic elements of this software. However, Photoshop elements is a good way to create beautiful images and retouch photos. This program is easy to use and has fewer features than its professional counterpart. You can upload images to Photoshop by downloading them and dragging them into the program. Photoshop even has a built-in tool to simplify this process, named the "photo toolbox." It lets you drag 05a79cecff

Nurse Licensure Nurse Licensure Overview The Nursing Licensure Examination (NLE) is offered for general education purposes only. It is designed for individuals who are interested in exploring the various health-related careers that become available after graduation from an accredited college/university. The National Advisory Board of Nurse Licensure Examiners administers and examines all Nurse Licensure Examination (NLE) and Nursing License Examination (NLE) examination materials for accuracy and validity prior to release. Individuals must also demonstrate their eligibility to practice as a Registered Nurse in the State in which they have passed the examination. The Nurse Licensure Examination (NLE) is a process governed by State laws and administrative rules. The first attempt will be made to obtain results for all candidates who take the examination within two (2) weeks of the administration date of the test (see you are advised to check the expiration date at the top of the exam). Candidates must re-take the NLE exam within one (1) year of the date of the first attempt. Nursing Candidate Scholarship In support of our RN and LPN students Through nursing-specific tuition, and financial aid, the Minnesota State Colleges and Universities Board of Regents works to support the education and training of nurses at the undergraduate and graduate levels. These funds are specifically intended to enhance the preparation of nursing students for advanced degrees and licensure examinations. In order to receive maximum assistance, a student must be enrolled full time in a Minnesota State College or University. To ensure that nurse-prepared students are able to afford the cost of college and college tuition, the Nursing-Specific Tuition Assistance Program provides funds to assist nursing students as they pursue their higher education goals. This program encourages nurse-prepared students to work their way through their nursing degrees, offering partial tuition assistance and work-study programs in lieu of loans and private scholarships. To have the funds to assist nursing students in their educational and training needs, the Minnesota State Colleges and Universities Board of Regents awards scholarship monies to the Baccalaureate School on an annual basis. Since 1976, the Board has awarded \$4.3 million in nursing-specific tuition assistance to programs across the state. The maximum annual award amounts are \$5,000 for Minnesota State Technical College System of Minnesota, \$2,500 for Minnesota State Colleges and Universities System of Minnesota and \$5,000 for Minnesota

The exo-growth factor Shh is necessary for the survival of hepatic progenitors in the mouse. Progenitor cells are crucial components of the liver, as they are responsible for maintaining the proliferation of the entire hepatic parenchyma during fetal liver development and maintaining the differentiated hepatocyte phenotype throughout life. Here, we show that the Sonic Hedgehog (Shh) protein induces the growth of liver progenitors isolated from E14.5 fetal liver lobes. These progenitors could be killed by the combined administration of tumour necrosis factor (TNF)-alpha and cycloheximide (CHX) in a dose-dependent manner. Interestingly, the number of progenitors surviving the toxic insult was increased when the cells were incubated with the exogenous Shh protein. The expression of the specific receptor Patched (Ptc) was detected in the progenitors, whereas the expression of Smoothed (Smo), an activator of Ptc, was not. The effect of Shh was blocked by the administration of cyclopamine, a Ptc antagonist. These data show that Shh promotes the survival of progenitors from the embryonic liver and support a role for this mechanism in the growth of progenitors in the adult liver. Despite global efforts to support people affected by the ongoing drought in southeastern Africa, the water situation continues to deteriorate, according to the UN's World Food Programme. "People are already dying of dehydration and malnutrition because of the drought, which is the worst in the region since 2007. Already 1.8 million people were affected by food insecurity in Zimbabwe before the current drought," Marco Lambertini, director-general of the WFP said in a statement. "The situation is now exacerbated by the high food prices of dairy and poultry, due to the prolonged drought, and the pressure it puts on international prices," he added. People in the southern African country have been using their own water to meet their daily household needs, according to the WFP. "Based on international advice, Zimbabwean authorities told us to boil our drinking water before drinking it, but that doesn't solve the problem," said the WFP. "We need new ways of helping people to be able to survive. How can we be more innovative and resourceful to survive in this situation? How can we boost our agricultural production? In most of
