The match is played against the CPU of IFA Editor. The CPU is a real-time artificial intelligence AI that learns over the course of gameplay and makes decisions based on the information it receives from the player's performance during the match. This AI engine incorporates all aspects of gameplay, from strategy to tactics and team behaviour, in a way never seen before in FIFA. It is not just about making moves, however, as the AI engine incorporated into IFA Editor creates many game situations, from rebounds and open play opportunities to scoring goals, with only the most basic controls available. It also provides all the tools for the player to make their own decisions and tactics, allowing them to master the game. In order to play against the IFA editor, or any of the other modes available, you will need to install this component. The Editor's package requires an IFA license. However, in order to play the Editor's game in matchmaker, you need the Editor along with an IFA license. IFA Editor offers a wide variety of characteristics, while making easy work of creating different game types or adding new modes, or creating new gameplay. By enabling matchmaker through the new MyClub section in Ultimate Team, the Editor's game will be auto-added to any Ultimate Team league that contains the Editor as part of the experience. This feature will be available both for new and existing Ultimate Team users. Players may leave the Editor game when it is not their turn. There is no need to exit the Editor when one chooses to leave the Editor game and goes back into MyClub or the normal game. Edit 1.8.0 World Cup Edition (for PC and Xbox One) This World Cup Edition of the IFA Editor will be compatible with the WCF, WCQ and WCQ Sound Editor. Edit 1.9.0 FIFA World Cup Edition (for PC and Xbox One) Along with the FIFA World Cup, FIFA World Cup Edition is also now available for PC and Xbox One. Edit 1.9.0 FIFA World Cup Edition Patch Notes • The official IFA World Cup app on the Xbox One is now compatible with IFA Editor on the Xbox One • Some assets will be loaded automatically if present in your savegames • More specific minor fixes • A set of backup files will be added to the game storage on Xbox
