Let me get this off my chest right now. It wasn't a good night for the Kansas City Chiefs against the Indianapolis Colts last night. The Chiefs had their quarterback go down early, and the offense sputtered around the midway point of the game. On a night when Andy Reid needed to see the team perform well to get his contract extended, he saw a flat Chiefs' offense give away the game to the Colts. Andy Reid can't coach, therefore, he is fired. Don't know if that is a popular statement after five straight wins, but I think he needs to be fired. Andy Reid is a deadbeat, unreliable, and poor offensive coordinator. If he was so good that he got the Chiefs to the playoffs the past 4 seasons, then why is he a terrible offensive coordinator? Has he done anything to help the Chiefs this season? Has he done anything but help his own career? Andy Reid has squandered a 2-0 start to the season and placed the Chiefs in a tough hole to climb out of. Why should Andy Reid get paid more than Bill Belichick, Pete Carroll, and Jon Gruden? Why should he keep the job, and why should the Chiefs keep giving him long term contracts? The Chiefs needed to fire Reid last month after the embarrassing 24-21 loss to the Tennessee Titans. Reid can't get the offense going and is relying on Steve Spagnuolo's lackluster defense to help save his job. The Chiefs needed to fire Reid last month, and they did not. So, the Chiefs remain, and so does Reid. Reid can't coach, and so he is fired. Like the Rooney Rule in Cleveland, the Chiefs must fire Reid. The Rooney Rule is a rule that requires teams to interview at least one minority candidate for head coaching positions. In Cleveland, it has been successful, giving success to minorities in the NFL. Don't get me wrong. I don't want Reid fired. My first coach, Bill Parcells, was fired and so was his successor, Eric Mangini. Does the Rooney Rule apply in Kansas City? Is that why Reid is still here? Reid, like Bill Belichick, Pete Carroll, and Jon Gruden, is worth the same amount of money whether he coaches the Chiefs or a Jaguars practice squad. Reid is not worth the money he gets paid, and the Chiefs need to fire him and start over. What happened in Indianapolis was inexcusable

1. Field of the Invention This invention relates to a band saw machine and a band saw blade. The band saw blade is particularly suited for the manufacture of frame parts, such as I-beams, T-beams and channel sections for use in the manufacture of building frames. 2. Description of the Related Art Numerous band saw blades are known in which, in the centre, a straight or curved row of teeth is connected to an outer band in a comb-like manner by means of cut-out material on the front side and/or on the rear side of the outer band. In this connection, it is known to provide one or several band saw blades with a blade body, which may be of a very complicated construction, with a passage or an opening in the form of an at least substantially rectangular opening through which a blade extending into the band saw can be removed. DE 38 19 212 A1 describes a band saw blade of this type, in which there are several openings in the form of round openings or rectangular openings in the blade body. DE 196 51 717 A1 describes a band saw blade in which the opening in the form of an at least substantially rectangular opening is formed between successive tooth rows, and which is bounded on the front side and on the rear side by tooth rows which are offset relative to the tooth rows which form the opening. U.S. Pat. No. 5,180,542 describes a band saw blade in which several openings are formed in the blade body, the edges of which openings are bounded by at least one tooth row formed on a side of the outer band.

DARTMOUTH, England — As the cruise ship passengers gathered in the shade of a sailaway day in the English Channel, the captain of the Royal Caribbean cruise ship Anthem of the Seas gave a briefing about the dangers of going overboard. “According to a recent survey, 51 percent of people who sink take more than five minutes to float or they sink slowly,” Captain Robin Urbina said in a recording of a foreboding safety lecture. “The safest way to go overboard is to jump from a fixed ladder or a ship's side that is at least three feet high.” The same advice was reiterated as the passengers listened through earphones. “The main hazards are of course the freezing water and being dragged down by the ship's propellers,” Mr. Urbina said
