i did the update process to get to 1.3.1 and did the process of re-installing, it all went well until i got to load the game, then it stopped and gave me an error box that said that it was unable to connect to the network server. i am using a windows 8, i downloaded this game on a windows 8, i have the game files and i can start the game, everything works great, and then the game crashes. i understand that this version of the game has been released on wednesday, and the update was on friday which means the update process started at the latest. the update process crashed when it was about done. i had to reinstall the game at this point and the update process starts to run from that point and it seems to run well. the only problem is that my new install still crashes every time i play a game. i am closing in on between 60-80 hours on this one and i am starting to lose my patience. i am playing from my phone, and also online from my computer and the phone. i have reinstalled the game two times now, and i just want to know what this game does that causes it to stop and give an error box. i am going to have to get it solved one way or another. i am enjoying this game. it is a very addictive game. i like the map size and the way you can get lost on it. you can also get lost on the road. it is also nice that you can drive to these places in a truck that you have built. in game purchases are also a nice addition. i really like the game play, the way it plays. i like the fact that you get to choose which truck you are going to drive. i have been playing this game for about 2 years. i am a truck driving fan and have been enjoying this game for all of that time. i look forward to seeing the game grow. i have been a truck driving fan for a long time. i have always liked truck driving. i don't like the map being made to small. 5ec8ef588b
