Using Microsoft MDAC ActiveX Library (verified: it can access the certificate) I can perform operations like: Checking the Certificate Authorities Cross-referencing certificates with previous versions Cross-referencing certificates with the certificate's issuer. I don't know how to check whether a certificate is valid or not. Microsoft only provide a method to verify the validity of a certificate: void CERTNODE::VerifyValidity() This method returns 0 if the certificate is valid and, for example, -1 if the certificate is revoked. It seems I have no choice but to verify the validity of the certificate from another library that implement this check, instead of the one provided by Microsoft.

And that is why Goyath is getting all these links wrong about the criminalization of torrenting; the only reason to launch a full-blown investigation is because of a political campaign. It has nothing to do with the legal case that, according to that PCMag article, is going nowhere. If there's a case to be had, the public prosecutor in Bucharest ought to have it by now. I didn't find a site that had all the torrents on but I did find the websites that had a bunch of them on. One of them is Nauty's list of torrents at Mobipocket. It lists all the chapters for each of the books in the Dawn Song Series. The books are listed by book title first and then by date. He also lists the newest ones first. You can also sort by most recent (oldest or newest) and least recent (oldest or newest) Kicking and screaming, TorrentFreak is no longer very interested in the subject of copyright. With the process of creating a kickass clone underway, it may as well shut up about the case. Besides, we've got a new section called "torrent breaking news" up and running. We've named it that because a large amount of people often post "breaking" news relating to the legal issues surrounding torrenting. If you're new to KAT, it's well worth checking out the latest news for the most popular torrents by looking through our main news page. KAT Torrent users can now add just about any torrent to their list of favorite torrents from other sites. Users can add web sites of their own by using the web site add torrent feature which is easy to find and easy to use. Also added to the list are all the torrents available from other providers on the site. 5ec8ef588b
