If you create a new expansion in nova or nexus, you will not be able to see the new expansion in the librarian. However, they will appear in your presets in nova or nexus, which can be edited with the new content. This is intended to be used for use with your own presets. NEXUS 4 introduces the return of the Colorfixer Pro plugin to enhance the librarian with a powerful color correction tool. Create and save your own color profiles in the Colorfixer Pro for ultimate flexibility. The editor also makes it easy to apply your newly saved profile to your existing presets. NEXUS4 continues the improvements to the librarian by generating previews and tags for all user presets. Folders are now easier to navigate as they can be searched by prefixing search terms with a slash e.g. /House to find all expansions with House in the name. As well, folders can be marked as favorite from the right click menu. Separators between groups of folders help keep things organized. This is a compilation list of all the Free Nexus 2 XPs we have posted in the last few months. For new visitors this might be a little overwhelming, you probably dont know which one to download first. They are all filled with very solid nexus presets, so grab them all. If you have known about our site for a while then you may have most of these but check out the ones you missed! 17.
